-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 January 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

The following is a quotation of 35 USC, §103 which forms the basis for all obviousness rejections set forth in the Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) and (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103, the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made, absent any evidence to the contrary. Applicant is advised of the obligation under 37 C.F.R. 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103.

Claims 1, 2, 4, 6 are rejected under 35 U.S.C. §103 as being unpatentable over Witten (USP 5,998,376).

Witten teaches that aerosolized substance P can be used to treat disorders resulting from inhalation of jet fuel. Among the relevant passages are the following: col 2, line 65+, col 4, line 59, col 4, line 62, col 5, line 16+. In particular, if substance P is indeed effective to treat viral infections, as asserted by Witten, the immunologist of ordinary skill

would expect a gradual reduction in the presence of inflammatory mediators as the virus is eradicated. Applicant may hold the view that suppression of the immune system is beneficial to those suffering from viral infections. However, this is not the correct view; for a patient stricken with a viral infection, suppression of the immune system can exacerbate the illness.

Claim 1 does make reference to various mediators of inflammation. But no time frame is specified. Thus, the examiner is free to assume that all time periods, from three days to three years would be included. As such, the claims are rendered obvious.

Claims 1, 2, 4, 6 are rejected under 35 U.S.C. §103 as being unpatentable over Robledo (*Am. J. Physiol.* **276** (Cell Mol Physiol 20), L229-L238, 1999).

Robledo discloses that [Sar<sup>9</sup>, MetO<sub>2</sub><sup>11</sup>]substance P was effective to mitigate lung injury that is induced by jet fuel.

Thus, the claims are rendered obvious.
